Mr. French's Corner

To finish the year, we will focus on tips to help prevent summer learning loss. On average, students lose 17-34% of what they learned during the school year. The good news is you can help to prevent some of that learning loss with just a few small activities each day.

Tip #1: Try to find free events and activities around the community. There are lots of free and low cost activities at local libraries, museums, etc.

A note from your school nurse: Allison Nestor, RN

Flu season is here!! Get your Flu shot now!! And everyone needs to practice healthy habits to stay well. Besides eating nutritious foods and getting enough rest, hand washing is one of the best ways to prevent the spread of germs at home and school. Please remind your children to wash their hands with warm, soapy water before eating, after using the restroom and anytime they blow their nose or sneeze. **If your child does become ill, please keep him or her at home until they are free of fever for 24 hours without the aid of medication (Tylenol/Ibuprofen). A temperature of 100.4 or higher is considered a fever.** If your child tests positive for Covid-19 please contact the hotline at **812-542-2270** for further instructions. Students should also remain at home for recent vomiting or diarrhea (3 or more loose stools in 24 hours). Students diagnosed with strep throat should stay home until they have been on antibiotics for 24 hours. This helps prevent the spread of illness. Always call your healthcare provider if the symptoms have not improved after a few days. Thank you!
